About Us

Eastern Sky Industrial Services is an emerging industrial solutions provider delivering maintenance, contracting, operational support, and skilled manpower for industries and commercial sectors.

We focus on quality workmanship, safety-driven execution, and dependable workforce delivery—ensuring smooth plant operations and long-term asset sustainability for our clients. We understand that industries operate on timelines, safety protocols and continuous delivery. That is why our approach focuses on well-trained teams, streamlined workflow systems, and an uncompromising focus on safety standards.

OUR VISION

To become a trusted industrial partner known for excellence, innovation, and skilled workforce deployment, expanding capabilities across regional and international markets.

That is why we continuously improve our workforce capability through training, supervision and compliance with industry regulation and safety norms.

OUR MISSION

To consistently deliver safe, efficient, and dependable industrial services that enhance operational performance, reduce downtime, and strengthen client productivity.

We aim to be a service partner industries can rely on in urgent requirements, large-scale projects, and long-term operational support.

OUR CORE VALUES

Safety First

Every operation, every worker, every day is guided by safe practices.

Quality Delivery

Precision, accountability, and zero-compromise on work standards.

Technical Competence

Skilled hands and trained minds ready for industrial challenges.

On-Time Execution

Planned timelines, quick mobilization, and dependable delivery.

Our Services

Contracting

Structured execution of civil, mechanical & electrical works for industrial and commercial infrastructure.

Operations Support

On-site operational assistance with skilled workforce to ensure seamless day-to-day plant activities.

Manpower Supply

Deployment of qualified, skilled & semi-skilled workforce for industrial tasks and plant operations.

Industrial Maintenance

Maintenance support for machinery, plants and production equipment to ensure continuous functionality.

Commercial Maintenance

Maintenance solutions for commercial establishments including buildings, malls, warehouses & offices.

Operations Management

Complete management and supervision of operational workflows for improved productivity and uptime.

Workforce Staffing

Short-term, long-term & project-based staffing solutions tailored to meet workforce requirements efficiently.

Equipment Rental

Industrial equipment, machinery & tools available for rental with quick deployment and support.

Integrated Project Support

End-to-end support for industrial projects including manpower, equipment, logistics & operational assistance.

Contracting Services

Our contracting solutions are designed to support small, medium, and large-scale industrial projects. We deliver mechanical, civil, and electrical contracting services, ensuring structured execution with skilled labor, proper supervision, and strict adherence to quality and safety compliance.

From initial planning to final execution, we coordinate closely with clients to meet project targets, technical requirements, and industry standards. Our team ensures smooth coordination, timely progress, and cost-efficient implementation throughout the project lifecycle.

Includes :

- Industrial project contracting
- Mechanical installation & fabrication
- Civil work for industrial and commercial units
- Electrical installation, testing & commissioning
- Site development and project execution support

Operations Support

Industrial plants and commercial establishments require continuous monitoring, supervision, and operational workforce to function without delays. Our operations support division provides trained workforce to assist day-to-day plant execution, equipment handling, asset management, and production workflows.

We deploy operational teams based on requirement — from short-term assistance to long-term support contracts — ensuring the client always has resources available when required. This enables uninterrupted operation, reduced downtime, and smoother workflow throughout the facility.

Includes :

- 🏠 On-site operation workforce
- 🏠 Technical supervision & monitoring staff
- 🏠 Equipment handling & production support
- 🏠 Shutdown support teams
- 🏠 Safety-compliant execution workers

Manpower Supply

Workforce is the driving force of industry — and we specialize in providing it with speed and efficiency. We supply skilled, semi-skilled, and technical manpower for industrial and commercial environments across various trades and operational categories.

Our manpower allocation is based on skill evaluation, safety awareness, and experience in relevant industry conditions. Whether the requirement is for 10 workers or 100+, we ensure fast deployment, verified profiles, and workforce capable of handling demanding operational tasks.

Includes :

- Technicians & Engineers
- Welders, Fabricators, Pipe Fitters
- Machine Operators & Supervisors
- Electricians, Helpers & General Workers
- Short-term, long-term & project-based staffing

Industrial Maintenance

Industrial facilities depend heavily on uninterrupted machinery performance and production continuity. Our industrial maintenance team ensures that equipment, systems, and production lines operate efficiently with minimal downtime and maximum output stability.

With trained technicians, strong safety culture, and structured maintenance planning, we support industries in shutdown maintenance, repair work, equipment inspection, lubrication management and mechanical upkeep. Every maintenance task is executed with precision and quality standards, ensuring smooth operational flow and long-term asset reliability.

Key Strengths :

-  Preventive & predictive maintenance planning
-  Skilled technicians for mechanical, electrical & instrument jobs
-  Reduced downtime through rapid repair response
-  Safety-compliant maintenance procedures
-  Long-term asset performance improvement

Commercial Maintenance

Commercial infrastructures such as malls, offices, retail spaces, and corporate buildings require consistent upkeep to maintain functionality, safety, and customer experience. We provide scheduled maintenance services including electrical checks, HVAC upkeep, plumbing, building repairs, and facility management to ensure establishments operate smoothly without disruption.

Our approach focuses on cost-effective maintenance programs that extend asset life and avoid sudden breakdowns. From regular cleaning and inspection to emergency breakdown handling, we ensure commercial environments remain operational, secure, and well-maintained for tenants, employees, and customers.

Key Strengths :

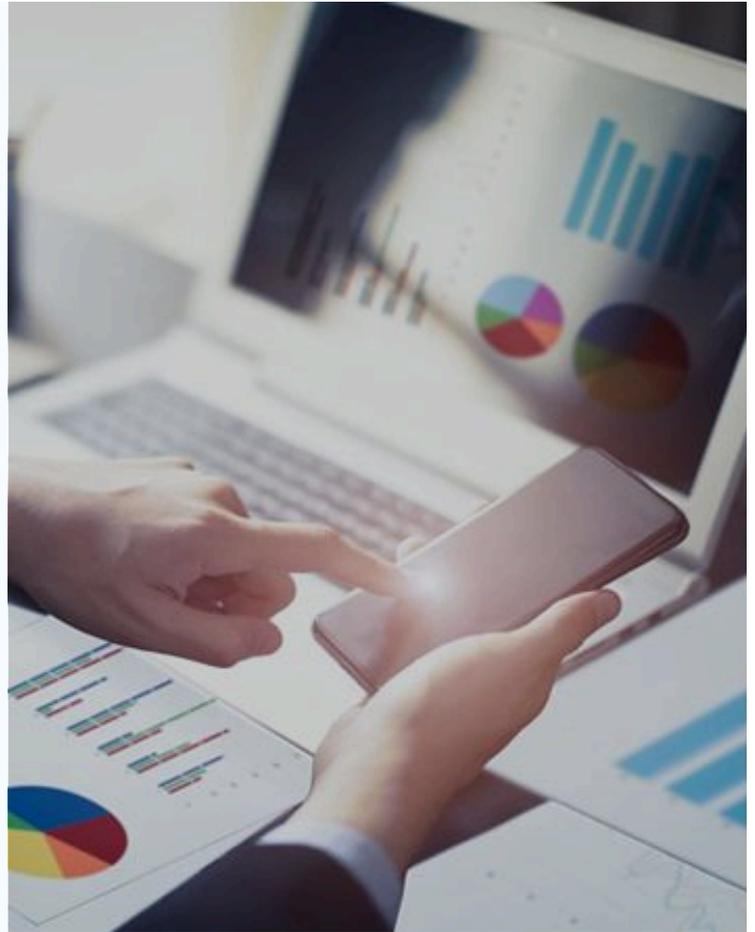

- 🏠 Planned facility maintenance for commercial buildings
- 🏠 HVAC, electrical, plumbing & structural upkeep
- 🏠 Fast breakdown response & troubleshooting
- 🏠 Improves safety & operational reliability
- 🏠 Enhances building longevity and service lifespan

Operations Management

Our experienced operational teams plan, delegate, monitor performance, and maintain compliance at all levels. This enables clients to enhance productivity, maintain consistency in output, reduce risks, and meet operational targets more effectively.

- End-to-end operations supervision & control
- Monitoring, reporting & workflow optimization
- Skilled operations team deployment
- Improved productivity with reduced errors
- Supports continuous plant & facility uptime

Workforce Staffing

Each workforce member is screened for skill competence, safety awareness, and previous experience before deployment. We quickly mobilize staff based on client requirements while maintaining reliability, flexibility, and cost efficiency in every hiring cycle.

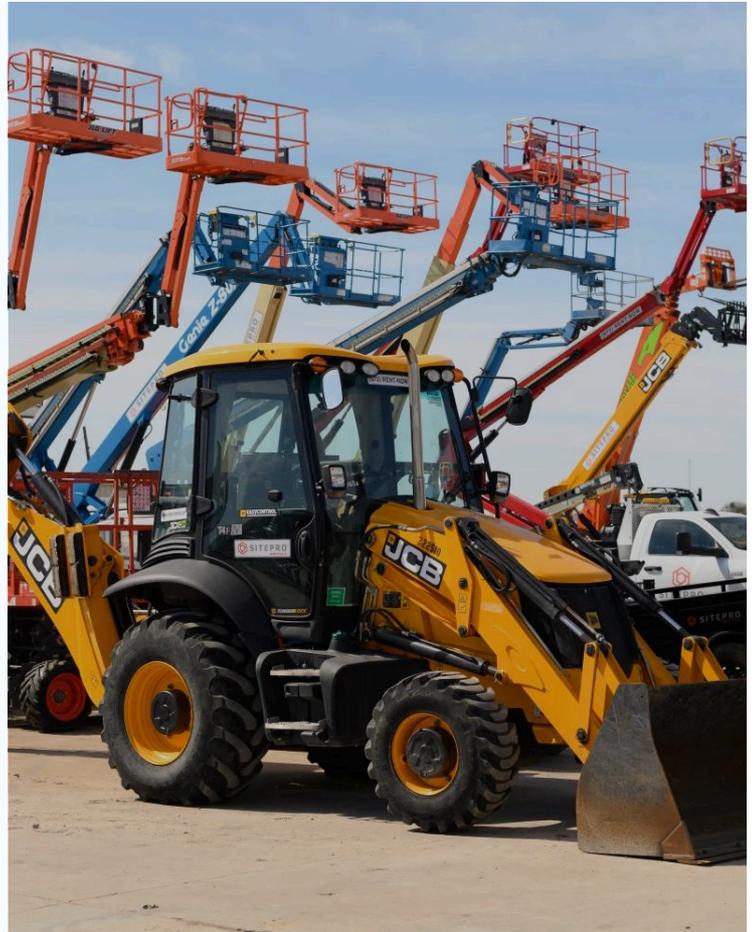

- Short, long-term workforce supply
- Skilled & technical staff availability
- Verified candidates with industry experience
- Fast deployment from small to large numbers
- Reduces hiring overhead for clients

Equipment Rental

Our rental inventory includes multiple categories of industrial equipment with quick delivery and operational support. We ensure all machines are inspected, serviced and safety-checked before dispatch so clients can work confidently without operational risk.

- Wide range of equipment, machinery available
- Cost-effective to equipment purchase
- Safety-checked machines
- Quick delivery & pick-up scheduling
- Flexible rental plans- daily, weekly or monthly

Integrated Project Support

Projects require more than manpower or equipment — they need full-spectrum support to run successfully. Our Integrated Project Support Services provide combined resources such as workforce, equipment, supervision, logistics support and operational planning under one streamlined package.

- Support covering manpower, equipment
- Coordination with single-source responsibility
- Designed for shutdowns, heavy operations
- Improved execution speed with fewer delays
- Logistical, operational resource support
